

How to handle industrial paper sacks properly – new handling recommendations give guidance

Paris/Stockholm, 7 December 2017: When filling, storing or distributing industrial paper sacks, poor handling practices can increase the risk of damage to paper sack materials or filled paper sacks. The handling recommendations for paper sacks launched by the European Sack Group – a collaboration between CEPI Eurokraft and EUROSAC – provide illustrative information about risks as well as best-practice instructions. The brochures contain useful advice for fillers, distributors and retailers on how to prevent damages in their operations along the paper sack supply chain.

“Paper sacks are very strong and sustainable packaging solutions for powdered materials,” explains Catherine Kerninon, General Delegate of EUROSAC. “With our handling recommendations we want to support fillers, distributors and retailers to identify aspects in their operations where they may be able to reduce or eliminate damages due to incorrect handling or palletisation practices.” She emphasises that by applying best practices they’ll be able to take most advantage from the multiple benefits of paper sacks.

The guidelines are divided into two parts to address all players in the paper sack supply chain who handle empty and filled sacks: Part 1 includes best practice instructions for filling sites. Part 2 is directed at distributors and retailers. From the storing of paper sacks prior to filling, via handling and stacking of palletised loads, up to storage or display – both brochures inform with many vivid illustrations about possible risks during the different operational steps at the respective site. Furthermore, they explain which consequences these risks might entail and how to handle paper sacks properly.

The [handling recommendations](#) are available in English, French, Italian and German for download on the websites of EUROSAC and CEPI Eurokraft. For further information please contact Catherine Kerninon: +33 (0)147 237 558, e-mail: info@eurosac.org.

***EUROSAC** is the European Federation of Multiwall Paper Sack Manufacturers. The federation represents over 75% of European paper sack manufacturers. Its members operate in 20 different countries. They produce more than 5 billion paper sacks per year, representing 650,000 tonnes of paper converted in 60 plants. Sack manufacturers from all continents and bag manufacturers also contribute to the federation as corresponding members, and more than 20 suppliers (paper, film, machine or glue manufacturers) are registered as associate members. www.eurosac.org*

CEPI EUROKRAFT
European Producers of Sack Kraft Paper and Kraft Paper

PRESS RELEASE

7 December 2017

***CEPI Eurokraft** is the European Association for Producers of Sack Kraft Paper for the Paper Sack Industry and Kraft Paper for the Packaging Industry. It has eleven member companies representing a volume of 2.5 million tonnes of paper produced in twelve countries. www.cepi-eurokraft.org*
